Please note that this process can take up to $\underline{100}$ days.

Also, make sure you contact 595-8020 for information on City-required inspections and certificate of occupancy.

GENERAL PERMIT INFORMATION

What is a permit? A permit is a written notice authorizing an owner or contractor to proceed with work (construction, repairs, etc.) after paying the permit fee.

Building Permit Process

Who needs a permit?

A permit is issued to an owner or a contractor which allows him/her to complete work in the City of Kingsville. All contractors **must be** registered with the City of Kingsville.

Homeowner's Permit

A homeowner may purchase a permit, with the exception of an electrical permit, mechanical permit and a plumbing permit, which must be purchased by a licensed contractor and the work completed by that contractor. When purchasing a homeowner's permit, the homeowner is certifying that they own and are now living at the dwelling for which the permit is being issued and that the work being performed is by the homeowner or their immediate family; he/she also also understands that for the purpose of the permit, "immediate family" is limited to his/her parents, child or child's spouse.

Type of Permits

The following permits are the most common. Please call 361-595-8019 to determine if your intended work requires a permit.

Building / Structure – additional square footage, relocating a structure, remodeling, repairing

Curb Cuts / Driveway – curb cuts for the creation of a driveway or a ramp, new driveways, etc.

Electrical – new square footage, repairs, change outs, etc.

Gas - repairs

Mechanical – new square feet, repairs, change outs, etc.

Meter Inspections- required for service connection (new, temporary, etc.)

Plumbing – new square feet, remodeling, repairs, etc.

Roofing - All repairs or re-roofs

REMEMBER TO GET YOUR PERMITS. IF YOU ARE CAUGHT WORKING WITHOUT A PERMIT, YOU WILL BE CHARGED \$150 + DOUBLE-FINED.

- PROOF OF OWNERSHIP <u>MUST BE PROVIDED</u> BEFORE ANY PERMIT CAN BE ISSUED.
- 2. ALL PROPERTIES MUST BE A "LEGAL LOT" BEFORE A PERMIT CAN BE ISSUED.

SAMPLE OF ACCEPTED DRAWINGS

BUILDING PERMIT CONDITIONS

These permit conditions are intended to highlight important building-related regulations. They <u>do not</u> represent a comprehensive list of building laws. For additional information, please refer to the appropriate City and County building ordinances.

GENERAL

- 1. The building permit shall be posted on the job site in public view, along with a list of standard and special permit conditions in English and Spanish.
- 2. After a permit has been issued, it shall be unlawful for any person to modify or alter any plans without the prior written approval of the Building Official.
- 3. Work under any City Permit shall begin within 6 months and <u>must be completed</u> within 12 months after the permit is issued, unless an extension is granted in writing by the Building Official.
- 4. A permit may be revoked by the Building Official if work has stopped for 30 days.
- 5. It is unlawful to continue work when a permit has been suspended or revoked or when a "Stop Work Order" has been issued.
- 6. The City may examine the work and the building as often as necessary and may order any change in the work necessary to comply with City Regulations.
- 7. The City must be notified 48 hours in advance of required building inspections.
- 8. Construction noise levels must conform to the City Ordinance, entitled Article 6: "Noise Control."

PRIVATE PROPERTY SITE MANAGEMENT

- 1. The building site shall be kept clear of all rubbish, including trash and construction-related debris.
- 2. The location and screening of all dumpster and portable sanitation facilities shall be approved by the City and noted on the site plan. No dumpsters or sanitation facilities shall be located in the public right-of-way.
- 3. Dumpsters may not be used as collection points for others construction sites or for discarding perishable waste.
- 4. Any required erosion and sediment control plan and/or tree protection plan must be maintained throughout the course of the permitted work.
- 5. Dust associated with demolition must be controlled by metered water spray. Dust associated with stone cutting must be controlled by a wet saw.
- 6. No commercial signs, except real estate signs, shall be posted on the site.

PUBLIC PROPERTY SITE MANAGEMENT

- No person shall store or allow an accumulation of refuse, excavation or construction debris, or any
 construction materials on any public right-of-way including, but not limited to, streets, sidewalks,
 curbs, gutters, and grassy areas. Accumulation of mud or dirt must be removed from the public
 right-of-way daily. Public sidewalks must be kept passable at all times, unless otherwise approved
 by the City.
- 2. Unattended construction pits and trenches in the public right-of-way shall be clearly marked and covered.
- 3. Any repairs, alterations, modifications to or closure of any street or sidewalk that prohibits the free passage of vehicles or pedestrians shall be clearly marked with barricades, safety barriers, or both and may not exceed ten (10) days, unless specifically authorized, in writing, by the Director of Public Works.
- 4. No vehicles may be parked on City sidewalks, driveway aprons or on any area between the curb and/or gutter and sidewalk.
- 5. Construction vehicles must park on the building site or on the side of the street directly in front of the building site, whenever possible.
- 6. <u>NO</u> construction trailers or other equipment shall be parked or stored on City streets or in the City right-of-way between the hours of 10 pm and 6 am.

AFFIDAVIT I have read the above requirements and Work Order," fines or revocation of my		ing them could lead to a "Stop
Applicant's Signature	Print Name	Date

7. Public property site management shall be complaint with the American with Disabilities Act.

City of Kingsville

e Permit Instructions & Application for Driveways/Sidewalks/Parking Lots

email: tcavazos@cityofkingsville.com / Phone (361) 595-8019

INSTRUCTIONS: Submit one (1) application; you may be required to submit architectural/engineering plans upon request and any supplemental information to ensure compliance with the City of Kingsville Code of Ordinances. When submitting electronic plans, please place job description ("Driveways/Sidewalks/Parking Lots") in the "subject" line. Email plans to: tcavazos@cityofkingsville.com.

Submitted drawings must include:

- Scaled drawing of site plan with driveway/sidewalk/parking lot location, size design and engineered standards (Architectural Plans)
- Weight limit (may require Engineering Plans)
- If installed over the public right-of-way, written permission from the City's Public Works Director is required

Permit applicants are required to meet conditions for all of City of Kingsville's ordinances, some of which may not be listed below. Ordinances can be found on our city website at:

https://library.municode.com/tx/kingsville/codes/code_of_ordinances

Common Driveway/Sidewalk/Parking Lot Ordinances:

Driveways, Street & Roadway Standards; Access to Businesses (Sec. 15-6-108)

Driveway and Permit Construction Requirements (Sec. 9-10-20 through 24)

Regulations for Access Driveways to State Highways Appendix, (Sec. 1-4)

Restricted construction; Alteration, Sidewalks, and Driveways Required (Sec. 9-10-4 and 9-10-5)

Alleys, Streets, & Pavement Cuts (Sec. 9-10-35, 36, 37)

Curb & Gutter (Sec. 15-3-50 (A&B))

Sidewalks (Sec. 15-3-51)

Landscapes in Parking Lots (Sec. 15-8-8, 9, 10)

Violations/penalties (Sec. 15-8-18)

Caution: Lot lines do not normally coincide with curbs, grader ditches, or sidewalks, and many fences are not located on lot lines. If you are unsure of the exact location of the lot lines, please have a land surveyor locate them.

The City of Kingsville is not responsible for locating pins or surveying your property.

Fees for Driveways/Sidewalks/Parking Lots: See City of Kingsville Permit Fee Schedule.

Inspections: Inspections can be scheduled by calling the Building Services at (361) 595-8019 within 24 hours. Please provide permit number and address of the property.

This form available on our website: https://www.cityofkingsville.com/departments/planning-and-development-services/

ARTICLE 8. LANDSCAPING POLICY

Sec. 15-8-1. General.

- (A) The information in this article is intended to define the technical design criteria needed to achieve the landscape policy goals of the City of Kingsville, Texas. These rules apply to all land located within the city limits and to those projects outside the city limits which have agreed to comply with these provisions as part of a contractual agreement with the city.
- (B) The site plan approval process is outlined in the City Code of Kingsville. Procedures for inspection and enforcement are also found in the City Code.
- (C) Appeals concerning the enforcement of these rules shall be brought to attention of the Director of Planning. (Ord. 97040, passed 11-24-97; Ord. 98027, passed 11-28-98; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-2. Reserved.

Sec. 15-8-3. Exemptions.

(Reserved)

Sec. 15-8-4. Specified by the city code.

The code identifies certain types of development projects which are specifically noted as being exempt from the Landscape Provisions of the Code, as follows, to wit:

- (A) Single family residences where only one such structure is constructed per lot.
- (B) Duplex residences (containing fewer than six bedrooms per lot) where only one structure is constructed per lot.
- (C) Restoration of damage to a structure within the 12 months subsequent to a fire, explosion, flood, tornado, riot or accident of any kind.
- (D) Building restoration for historic structures.
- (E) Remodeling of any structure where the front and side exterior walls remain in the same location. Two variations on this condition are illustrated in Figure 2-1.

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-5. Not clarified by City Code.

Other types of projects are exempt for other reasons. These include:

- (A) Projects on federal and state owned land.
- (B) Carports, canopies and free-standing covers supported by columns less than two feet wide and four feet long.

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-6. Basic requirements.

The following text explains the basic landscape requirements common to all commercial sites under the jurisdiction of the City Code.

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-7. Street yard.

- (A) Landscape area.
 - (1) At least 10% of street yard must be landscaped. Grass areas not using grasses indigenous listed on the Preferred Plant List (see Exhibit A) are not credited as landscaped area except in shaded areas (areas that receive less than six hours of sunlight per day).
- (B) Determining street yard.
 - (1) The exact configuration of a street yard (or street yards) on a site will depend on how a number of factors interrelate on that site. Among these factors are:
 - (a) Type and location of building walls.
 - (b) Number of streets that border the site.
 - (c) Number, size, and orientation of buildings on the site.
 - (d) Whether there is a building on the site or just a parking lot.
 - (2) The street yard area is calculated by finding the total lot square footage which lies between the street right of way line and the front wall of a building or buildings on a site. This street yard boundary extends from the outward most corners of the front wall, parallel to the street until it intersects with the side property lines.
 - (3) The building wall line shall include irregular shapes or indentions of the building wall, but exclude unenclosed porches, canopies and exterior columns. Some examples of variations on this concept are illustrated in Figure 2-2.
 - (4) On a site or portion of a site used only for parking purposes or as a commercial or private parking lot, the street yard shall consist of the area between the street right-of-way and the back property line.
- (C) Drip line credit.
 - (1) In order to encourage the preservation and continued growth of smaller trees, the following credit toward landscape area is possible. Each square foot of landscape area which is permeable and within the area encompassed by the drip line of a surveyed tree at least two inches in trunk diameter measured at 4½ feet above the ground, shall count as 1.25 square feet of landscape area.
 - (2) The foregoing credit shall be subject to the following limitations:
 - (a) Overlapping drip line area cannot be counted twice.
 - (b) No credit will be given if more than half of the drip line area is impervious.
 - (c) No credit will be given where damaging grade changes within the drip line (of a tree) has occurred.

- (d) In no case can the actual landscape area in the street yard of a lot be less than one-third of the required 10%.
- (D) Street yard trees. Within the area described as street yard in Section 11-12-71 a minimum amount of trees are required to be planted or preserved with at least 60% of the trees planted from the Preferred Plant List (see Exhibit A) to the area. Planted trees shall be no less than 6 feet initial height and no less than 1½ inch caliper measured at 4½ feet above the ground. No more than 50% of planted trees will be from the same genus or species (if more than ten trees are required), as follows:

TOTAL STREET YARD AREA	REQUIRED TREES
1,000—10,000 sq. ft.	1 tree/2,000 sq. ft.
10,000—110,000 sq. ft.	5 trees for first 10,000 sq. ft. plus 1 tree for every 5,000 sq. ft. over 10,000 sq. ft.
over 110,000 sq. ft.	25 trees for first 110,000 sq. ft. plus 1 tree for every 10,000 sq. ft. over 110,000 sq. ft.

(E) Existing tree credit. All existing surveyed trees over two inches in trunk diameter or tree clusters of at least four one-inch diameter trees preserved within the street yard boundaries may satisfy these requirements one for one. All trees measuring six inches or more in trunk diameter measured at 4½ feet above the ground shall count double toward satisfying these requirements.

(Ord. 97040, passed 11-24-97; Ord. 98027, passed 12-28-98; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-8. Landscape in parking lots.

- (A) Landscape area.
 - (1) Four square feet of landscaped area is required for each parking space within a parking lot located in the street yard. Three square feet for each parking space is required for all non-street yard parking lots.
 - (2) This landscape area should occur entirely within the parking lot boundaries as landscaped medians, landscaped islands or as landscaped peninsulas.
- (B) Islands, medians or peninsulas.
 - (1) A landscape island, median or peninsula should be located within 100 feet of each entire parking space on a lot. This distance should be measured from the curb line of the landscape island, median, or peninsula and should extend 1 foot into the entire parking space.
 - (2) Grasses not listed on the Preferred Plant List (see Exhibit A) cannot be planted on islands, medians, or peninsulas. At least 60% of the required landscape area must be selected from the Preferred Plant List (see Exhibit A) with no more than 50% of the plants from the species.
 - (3) To provide significant space for the growth of trees planted within these areas, the minimum width for landscaped islands, medians, or peninsulas which contain new trees is eight feet measured from the inside of the curb (see Figure 2-3).
- (C) Trees in parking lots. One tree must be located within 100 feet of each parking space. This requirement should also be considered when designating parking lot landscape area (see Figure 2-4).
- (D) Special provisions for large parking lots. The above paragraphs (B)(1) and (C), in Section 15-8-8, do not apply if this division (D) is required. For parking lots with more than three parking modules, a ten feet minimum width median (measured from inside of curb) will be required for every third parking module. Trees within the median must be located so that one tree shall be located within 50 feet of each parking space adjacent to

the median. No additional islands shall be required to satisfy Section 15-8-8 except for end islands for each parking module (see Figure 2-4.1). All landscape islands and peninsulas must be an eight feet minimum width measured from inside of curb.

(Ord. 97040, passed 11-24-97; Ord. 98027, passed 12-28-8-98; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-9. Buffering/screening.

- (A) Buffering is a site specific requirement that should be evaluated based on viewer distance and angle of view from the areas or site features requiring buffering. Buffer design should also consider the amount of view obstruction required and the type and mixture of design elements used in the buffer. Buffering is a site specific requirement that shall be between all multi-family (R-3 and above) and commercial and industrial land uses.
- (B) When buffering is required, the installation and maintenance thereafter of a visual screen of one of the following types shall be provided:
 - (1) A solid material and/or masonry fence or wall at least six feet in height.
 - (2) A hedge-like screen of evergreen plant material capable of attaining a minimum height of six feet at maturity, planted initially at a minimum of four feet on center. The plants will be a minimum height of two and one-half feet at time of planting. An irrigation system shall also be installed.
 - (3) Existing vegetation may be used as screening if the following conditions are met:
 - (a) The vegetation area is at least ten feet wide and a limit of construction line is clearly marked on the plans.
 - (b) The area must contain, per 20 linear feet of screen, the equivalent of one large tree (minimum two inch caliper), two small trees (minimum one inch caliper) and six evergreen plants at a minimum height of two and one-half feet with the minimum height attainment at maturity of at least six feet. If an irrigation system is not in place, one must be installed.

(Ord. 97040, passed 11-24-97; Ord. 98027, passed 12-28-98; Ord. 2005-13, passed 4-11-05; Ord. 2006-10, passed 4-10-06)

Sec. 15-8-10. Landscape of other areas.

Landscape of other areas shall include all landscaped areas that are not included as part of the Street Yard, Parking Lots or Buffering requirements.

- (A) Plant selection. At least 90% of the areas shall be planted with species from the Preferred Plant List (See Exhibit A). Up to 10% of the plants may be of a non-preferred variety as long as they are grouped together in a suitable area and can be irrigated separately.
- (B) Turf selection. Areas that receive more than six hours of sunlight per day shall be planted with turf species from the Preferred Plant List (see Exhibit A).

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-11. Soil conditioning and mulching.

(A) A minimum of three inches of organic mulch shall be added in non-turf areas to the soil surface after planting.

- (B) Non-porous material such as sheet plastic shall not be placed under the mulch.
- (C) A minimum of four inch permeable soil, native or imported, shall be required for turf and landscaped areas.

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-12. Irrigation of landscape areas.

- (A) The owner shall be responsible for the irrigation of all required landscape areas and plant materials, utilizing one or a combination of the following methods:
 - (1) An automatic or manual underground irrigation system (conventional spray, bubblers, drip, emitters, drip tubing, porous pipe and the like with tuft zones separated from planting zones unless otherwise approved;
 - (2) A hose attachment within 100 feet of all required landscape areas and plant materials where there is no road or parking pavement between the hose attachment and landscape area and the site plan area is no larger than 0.5 acre;
 - (3) Landscape areas planted with native grasses and wild flowers may use a temporary and above ground irrigation system and shall be required to provide irrigation only for the first two growing seasons.
- (B) The irrigation methods used shall:
 - (1) Be in place and operational at the time of the landscape inspection; and
 - (2) Be maintained and kept operational at all times to provide for efficient water distribution;
 - (3) Landscape working plans shall indicate, by a detail, a drawing or by specification in a note on the site plan, the nature and location of irrigation which will be used and the location of emergency irrigation system shut-off valve;
 - (4) No irrigation shall be required for undisturbed natural areas or undisturbed existing trees.

(Ord. 97040, passed 11-24-97; Ord. 98027, passed 12-28-98; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-13. Protection of landscape area.

- (A) All landscape areas adjacent to vehicular use areas shall be protected with concrete curbs or equivalent barriers.
- (B) An equivalent barrier must be at least six inches in height and anchored sufficiently to prevent movement. Examples of alternatives are listed below:
 - (1) Equivalent barriers:
 - (a) Asphalt curbs.
 - (b) Railroad ties (anchored).
 - (c) Rock or stone curbs (anchored).
 - (d) Bollards located with a distance between each not to exceed four feet six inches measured from the outside surface of the bollard.
 - (e) Wheelstops (anchored).

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-14. Alternative compliance.

- (A) The Director of Planning may accept alternative designs which prove to be as good or better than strict compliance with the basic landscape requirements.
- (B) Alternative proposals should be clearly identified on the landscape plans and the Building Permit application should include a letter outlining the alternative proposal. (See Exhibit C.) Review of the alternative proposal will be in conjunction with the Building Permit review.
- (C) To establish some guideline equivalents for the major landscape requirements listed in §§ 15-8-6 through 15-8-10, a list of alternative equivalent ratings are found below. These ratings assign relative values to the landscape elements of a design and should be used when formulating alternative proposals. Each basic requirement which cannot be achieved is assigned a negative point value and may be compensated for with positive equivalents shown in the compensation list. An example using this concept is provided in Figure 2-7.
- (D) These ratings are intended to provide guidance for proposing alternatives to strict compliance for unusual site specific conditions. However, other proposed equivalents may be accepted based on extremely unusual conditions, if approved by the Director of Planning.

ALTERNATIVE COMPLIANCE EQUIVALENT RATINGS Deficiencies

The following information should be used to formulate alternative proposals when a site design cannot conform to the basic landscape requirements as described in § 15-8-6:

Landscape Area as a Percent of Street Yard	Negative Points
<5%	- 12
5%	- 10
6%	- 8
7%	- 6
8%	- 4
9%	- 2
10%	- 0

(Ord. 97040, passed 11-24-97; Ord. 98027, passed 12-28-98; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-15. Screening standards.

A screening device is required between all R-1/R-2 residential land use/zoning and all types of multi-family (R-3 and above), commercial and industrial land use/zoning. Screening is also required between R-1/R-2 residential land use/zoning and all mobile home zoning land use/zoning.

(Ord. 2006-10, passed 4-10-06)

Sec. 15-8-16. General.

When screening is required, the installation and maintenance thereafter of a visual screen shall be provided consisting of a solid material and/or masonry fence or wall at least six feet in height which cannot be seen through.

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05; Ord. 2006-10, passed 4-10-06)

Sec. 15-8-17. Certificate of occupancy.

Landscaping. required in this section must be in place prior to obtaining a Certificate of Occupancy. (Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

Sec. 15-8-18. Violations; penalties.

- (A) It shall be unlawful to construct, reconstruct, remove or relocate any landscaped area or other appurtenance in violation of the provisions of this article; and proper city officials, or their duly authorized representatives, in addition to other remedies, may institute any appropriate action or proceedings to prevent such unlawful construction, reconstruction, removal or relocation, to restrain, correct or abate such violations, to prevent any illegal act, conduct business or maintenance in and about such premises. Each day such violation continues shall constitute a separate violation.
- (B) Any person violating any provision of this article shall be guilty of a misdemeanor, and each shall be deemed guilty of a separate offense for each day or portion thereof during which any violation hereof is committed, continued or permitted, and upon conviction any such violation shall be punishable by a fine not to exceed \$500.00.

(Ord. 97040, passed 11-24-97; Ord. 2005-13, passed 4-11-05)

EXHIBIT A. PREFERRED PLANT LIST

Other plants may be used if approved by the city. This list is a guide and is not meant to be exclusive. Any other native or well adapted plant may be used if drawings are sealed by a registered Texas Landscape Architect.

Evergreen Trees	Height	Features (N = Native)
Arizona Cypress	30'—75'	good heat and drought tolerance, aromatic
Cupressus arizonica		foliage
Cherry Laurel	25'—30'	N, screening plant, wildlife food
Prunus caroliniana		
Deodar Cedar	40'—50'	fine texture, needs drainage
Cedrus deodara		
Live Oak	50'-60'	N, oak wilt susceptible
Quercus virginiana		
Mountain Laurel	15'-25'	N, fragrant purple spring blossoms, small tree,
Sophora secundiflora		large shrub
Texas Madrone	25'—30'	N, distinctive, attractive bark, difficult to
Arbutus texana		propagate and transplant
Yaupon Holly	15'-20'	N, red berries in winter, small tree, large
Ilex vomitoria		shrub

Deciduous Trees	Height	Features (N = Native)
American Elm	60'—80'	N, vase-shaped canopy, susceptible to Dutch
Ulmus americana		Elm disease
Bald Cypress	60'—70'	N, fine texture, rust fall color
Taxodium distichum		
Bradford Pear	30'-40'	showing white spring flowers
Pyrus calleryana 'Bradford'		

Quercus muehlenbergii tree Cedar Elm 50'-60' N, fall color, small leaves Umus crassifolia Drilliant fall color, very adaptable Pistacia chinensis Pistacia chinensis Chinquapin Oak 40'-60' N, tall, slender form, dark glossy lush foliage Quercus Muhlenbergii 25'-30' summer flowers, many varieties Crape Myrtle* 25'-30' summer flowers, many varieties Lagerstroemia indica 20'-25' N, orchid-like blooms, not a true willow Chilopsis linearis 20'-30' nearly evergreen, drought tolerant Ulmus parvifolia 'Drake' nearly evergreen, drought tolerant Fragrant Ash 10'-12' N, fragrant white flowers in late spring Fraxinus cuspidata 60'den Rain Tree 20'-30' yellow spring blooms, drought tolerant Koelreuteria bipinnata* and K. paniculata Honey Mesquite 25'-30' N, drought tolerant, wood valued for smoking meat Mexican Plumb 15'-25' N, white spring blossoms, wildlife food Prunus mexicana 0'-12' N, showy white blossoms, small understory or patio tree Pecan 6'-12' N, showy wite blos	Bur Oak	60'-100'	N, large fringed acorn, majestic, adaptable

Cast Iron Plant** Aspidistra elatior		0	broad strap shaped leaves to 2 inches height
Glossy Abelia Abelia grandiflora	0		small pink flowers, glossy leaves
Muhly Grass Muhlenbergia lindheimeri	0		N, looks like small pampas grass
Pineapple Guava* Feijoa sellowiana	0		exotic fragrant flowers
Pomegranate* Punica granatum	0	0	orange flowers, yellow fall flowers
Primrose Jasmine Jasminum mesnyi	0		yellow flowers, mounding form
* susceptible to severe freeze			
** influenced by severity or duration of winter			

Deciduous Shrubs	Sun	Shade	Features (N = Native)
Althaea	0		showy summer flowers
Hibiscus syriacus			
Butterfly Bush	0		N, lavendar/lilac flowers, small fuzzy
Buddleia Davidii			leaves
Flame Acanthus	0	0	N, orange flowers attracts
Anisacanthus Wrightii			hummingbirds
Texas Lantana*	0		N, good summer color, many
Lantana horrida and L. camara			varieties
Trailing Lantana*	0	0	N, lilac colored flowers, summer
Lantana montevidensis			through fall
*susceptible to severe freeze			

Evergreen Vines & Groundcovers	Sun	Shade	Features (N = Native)
Asian Jasmine*	0	0	low vigorous ground-cover
Trachelospermum asiaticum			
Bigleaf Periwinkle		0	loose ground-cover, blue flowers
Vinca major			
Carolina Jessamine	0	0	N, fragrant yellow flowers in spring
Gelsemium sempervirens			
Coral Honeysuckle	0	0	N, coral flowers, red fruit, attract
Lonicera sempervirens			wildlife
Crossvine	0	0	N, yellow/red flowers, clinging vine
Bignonia capreolata			
Damianita	0		N, yellow flowers, low growing to 12"
Chrysactinia mexicana			height
English Ivy		0	clinging, vigorous, self-climbing vine
Hedera helix			
Fig Vine*	0	0	clinging vine, fine texture
Ficus pumila			
Lady Banks' Rose	0		yellow spring flowers, large cascading
Rosa banksiae			form
Big Blue Lilyturf		0	purple spike flowers, clump-like
Liriope muscari			foliage
Dwarf Periwinkle		0	blue flowers, ground-cover
Vinca minor			
Monkey Grass		0	tufted grass-like ground-cover
Ophiopogon japonicus			
Oregano	0	0	perennial, spreading herb
Origanum vulgare			
Stonecrop	0	0	low, fast growing ground-cover
Sedum spp.			
*susceptible to severe freeze			

Deciduous Vines & Groundcovers	Sun	Shade	Features (N = Native)
Bush Morning Glory	0	0	N, forms 1-1/2'—3' mounds of foilage,
Ipomoea leptophylla			lavender to purple flowers

Coral Vine	0		pink flowers in summer and fall
Anigonon leptopus			
Gregg Dalea*	0	0	N, purple flowers in fall, ground-cover
Dalea greggii			
Passion Vine*	О	О	N, lavender flowers, edible fruit:
Passiflora incarnata			Маурор
Trumpet Vine	0	0	N, orange-scarlet flowers, invasive
Campsis radicans			
Virginia Creeper*	0	0	N, red fall color, clinging vine
Parthenocissus quinquefolia			
*susceptible to severe freeze		_	

Flowering Perennials	Sun	Shade	Features (N = Native)
Silver Wormwood	0		N, aromatic foliage, white fuzzy
Artemisia ludoviciana			leaves
Black-eyed Susan	0	0	N, yellow dark-centered daisy, flowers
Rudbeckia hirta			May to September
Blackfoot Daisy	0		N, short white daisy flowers all
Melampodium leucanthum			summer, short lived
Butterfly Weed	0	0	N, orange/yellow flowers, attracts
Asclepias tuberosa			butterflies
Canna Lily	0		banana-like foilage, blooms in
Canna X generalis			summer
Cedar Sage		0	N, red flowers, naturalizes
Salvia roemeriana			
Cherry Sage	0	0	N, red, pink, or white flowers
Salvia greggii			
Cigar Plant	0		orange-yellow fall flowers
Cuphea micropetala			
Coreopsis	0		N, yellow spring and fall flowers,
Coreopsis lanceolata			clumping
Daylily	0		orange/yellow funnel-shaped flower
Hemerocallis fulva			
Fall Aster	0	0	N, blue/purple autumn flowers
Symphyotrichum oblongifolium			
Firebush*	0		red-orange flowers, red fall color
Hamelia patens			
Gayfeather	0		N, purple flower spikes in autumn
Liatris spp.			
Heartleaf Hibiscus	0	0	N, red flowers all summer
Hibiscus cardiophyllus			
Hymenoxys	0		N, small yellow daisy, bitter smelling
Hymenoxys scaposa			leaves
Maximilian Sunflower	0		N, yellow flower, late summer to fall
Helianthus maximiliana			
Mealy Blue Sage	0		N, blue flower spikes, spring and
Salvia farinacea			summer

Mexican Bush Sage	То		tall purple flower spikes		
Salvia leucantha			tan parpie newer spines		
Mexican Heather*	0		tiny purple, pink or white flowers		
Cuphea hyssopifolia			tin, parpre, prince in time		
Mexican Marigold Mint	0	0	yellow fall flowers, anise flavored		
Tagetes lucida			foliage		
Mexican Oregano	О		lavender/pink flowers, aromatic		
Lippia graveolens					
Oxeye Daisy	0		white early summer flowers, yellow		
Chrysanthemum leucanthemum			center		
Peruvian Verbena*	0	0	pink flowers in summer, low growing		
Verbena peruviana					
Pink Skullcap	0	0	pink flowers in summer, low growing		
Scutellaria suffrutescens					
Plumbago*	0	0	low growing, blue flowers		
Plumbago auriculata					
Purple Coneflower	0	0	N, purple daisy-like flowers		
Echinacea purpurea					
Rose Mallow	0	0	N, pink hibiscus-like flowers		
Pavonia lasiopetala					
Scarlet Sage	0	0	N, red, pink or white flowers, spring		
Salvia coccinea			to fall		
Spiderwort		0	N, purple-blue flowers, informal		
Tradescantia x Andersoniana			ground cover		
Turk's Cap	0	0	N, red flowers and fruit, colonizing		
Malvaviscus arboreus 'Drummondii'					
White Mistflower	0	0	N, white autumn flowers, attracts		
Eupatorium Wrightii			butterflies		
Wild Petunia		0	N, purple flowers from March to		
Ruellia nudiflora			December		
Zexmenia	0	0	N, orange/yellow flowers, May to		
Wedelia hispida			November		
*susceptible to severe freeze					

Turf & Low Grasses	Sun	Shade	Features (N = Native)
Bermuda	0		seed or hybrid sod
Cynodon dactylon			
Blue Grama	0		N, seed, fine-leaf tufted grass, good
Bouteloua gracilis			meadow grass, not for mowed lawns
Buffalograss	0		N, many seed varieties, sod available
Buchloe dactyloides			in '609' and Prairie hybrids
Little Bluestem	0		N, seed, blue-green, fine texture, not
Schizachyrium scoparium			for mowed lawns

(Ord. 2014-45, passed 8-11-2014)

EXHIBIT B. LANDSCAPE/IRRIGATION NOTES

SITE DEVELOPMENT PERMIT - IRRIGATION NOTES

Automatic irrigation systems shall comply with the following guidelines. These guidelines (No. 1—No. 7) shall be noted on the Site Development Permit and shall be implemented as part of the landscape inspection.

- Adjustable flow controls shall be required on circuit remote control valves and pressure regulation component(s) shall be required where static pressure exceeds manufacturer's recommended operating range.
- 2. Valve and circuits shall be separated based on water use, so that turf areas can be watered separately from shrub and ground cover areas.
- 3. Sprinkler heads shall have matched precipitation rates within each control valve circuit.
- 4. Serviceable check valves shall be required where elevation differential may cause low head drainage, adjacent to paving areas.
- 5. Sprinkler head spacing shall be designed for head-to-head coverage or heads shall be spaced as per manufacturer's recommendations and adjusted for prevailing winds. The system shall be designed for minimum rub-off and minimum over-spray onto non-irrigated areas, (i.e. paving and structures).
- 6. All automatic irrigation systems shall be equipped with a controller capable of dual or multiple programming. Controllers shall have multiple cycle start capacity and a flexible calendar program, including the capability of being set to water every five days. All automatic irrigation systems shall be equipped with a rain sensor shut-off device.
- 7. Irrigation construction plans shall include a water budget. A laminated copy of the water budget shall be permanently installed inside the irrigation controller door. Water budget shall include:
 - a. Estimated monthly water use (in gallons per application) and the area (in square feet) irrigated.
 - b. Precipitation rates for each valve circuit.
 - c. Monthly irrigation schedule for the plant establishment period (first three months) and recommended yearly watering schedule, including seasonal adjustments.
 - d. Location of emergency irrigation system shut-off valve.

EXHIBIT C. SAMPLE ALTERNATIVE COMPLIANCE LETTER

PROJECT NAME:
PROJECT ADDRESS:
DATE:
NAME OF OWNER:
ADDRESS OF OWNER:
ADDRESS LETTER TO:
NAME OF DIRECTOR: ;hg;Director of Planning City of Kingsville 200 E. Kleberg Kingsville, TX 78363
INCLUDE IN THE LETTER:

Created: 2024-05-29 11:27:59 [EST]

The body of the letter should state specifically in what way the project will not comply with the Landscaping Regulations and explain in detail how the alternative compliance proposal is "as good or better" than strict compliance as required.

The letter should also include the following:

- 1. The size, type and spacing of plant materials installed as part of the alternative compliance proposal.
- 2. The ordinance section numbers that the project is not complying with.
- 3. The contact person and the phone number where they can be reached during working hours.
- 4. The signature of the owner and agent.

(Ord. 2005-13, passed 4-11-05)

First question...do I need an inspection?

Short answer: Probably...please see the list of projects below that require an inspection:

Types of inspections. Due to the varying nature of construction, the types of inspections vary. The most common inspections are listed below and **should not** be construed as the only required inspections. If there are any questions, please feel free to reach out to the City of Kingsville development services.

Building

- 1. Footing (piers)
- 2. Foundation (pre pour)
- 3. Framing (including exterior sheathing before it is covered by a weather barrier.)
- 4. Masonry
- 5. Insulation
- 6. Fire Rated Assembly (including, but not limited, to drywall at required separations)
- 7. Building Final
- 8. Sidewalk/Driveway (city sidewalk and approach in easement)
- 9. Certificate of Occupancy

Mechanical

- 1. Mechanical Rough
- 2. Mechanical Final
- 3. Energy Final (duct tightness, where applicable, and blower door tests)

Electrical

- 1. Temp power
- 2. Underground
- 3. Electrical Rough
- 4. Meter loop (permanent power)
- 5. Electrical Final

Fire

1. Fire Life Safety Overall Annual

Plumbing

- 1. Underground Plumbing
- 2. Sewer Connection
- 3. Waterline
- 4. CSI Water line
- 5. Plumbing top out
- 6. Plumbing Final

Fuel Gas

- 1. Underground
- 2. Rough in

3. Final

NOTE: Work shall not be performed beyond the point indicated in each successive inspection without first obtaining the approval of the building official. The building official, upon notification, shall make the requested inspections and shall either indicate the portion of the construction that is "satisfactory as completed," or shall notify the permit holder or an agent of the permit holder wherein the same "fails to comply." Any portions that do not comply shall be corrected and such portion shall not be covered or concealed until authorized by the building official.

To schedule an inspection, call the City of Kingsville Planning & Development Services Department at (361) 595-8019/8055
